

I have been an xm customer since the beginning, xm traffic and instant weather is the best thing that happened to xm, i am a truck driver so i depend on good weather reports, and good traffic reports to avoid sitting in long back ups , and to know what type of weather im coming into, Just yesterday i was in Los Angeles and if it wasnt for xm instant traffic i would have been sitting in a long terrible back up and have would of been late for my pick up in fresno, ca, i strongly urge u to reject the NABs petition 04-160, im sure 100 percent of the driving workforce in the trucking industry who have the xm radio would appreciate it.
